MAGNOLIA SOULANGEANA

We have the finest lot of heavy, very bushy, well budded Soulangeana we have ever had. These Magnolias should be shipped before January 15th, in order to get dormant buds. Our quality is better and prices lower than ever before in our history. These are beautiful Magnolias and we invite you to come see them.

For those of you who might want to grow your own Magnolias, we have long been recognized as the producer of the finest quality liners. These are two year stock grown in our lath houses with a large amount of peat moss to produce a wonderful fibrous root system. All of our Magnolias are exceptionally nice this year. Please order early and let us ship before February 1st as new growth starts soon after. They can be stored the same as any other dormant shrub.
